PROJECTS

AlgoWiz - RCE System ✎
Full Stack Project
  AlgoWiz is a clone of LeetCode, a platform for developers to practice coding problems and improve
  their skills. This project was created as a **full-stack project** (my first full-stack project) using
  Express, MongoDB, Mongoose, TypeScript,TypeScript React (TSX), CSS3, and Tailwind CSS. It
  was my try to put hands on **Remote code Execution.**

Custom Redis Server ✎
A simple implementation of Redis commands in Node.js
  This project is designed to mimic basic Redis functionalities, including **handling string
  commands, lists, and sets**. It serves as an educational tool for understanding how Redis
  commands work and how to implement a **basic key-value store**.

Weather App
HTML/CSS/Js
  A basic Weather App that shows the weather of a city by entering its name, the project tells about
  my skills in **Html/css/Js** and my try to implement API on one of my Web Application

Gym Management System ✎
C++ Terminal Based Project
  Made a simple but effective C++ terminal based project that manages Gym registration and
  member management in 2nd year of my college degree.
